kind of borer beneath the bark. given a detail of the natural history of the Newark, Ohio, on or before June 15th. borer, and to these we refer our readers for more particular description of this pest of the apple week before the exhibition, it may be a mattree. For the present we shall copy from Vol. ter of impossibility to make arrangements to 7 of the New England Farmer, the following re- test in a thorough manner the tardy machines."

We heard many complaints last year of the ravages of the apple tree borer. In some cases the injury inflicted was said to be very extensive, and as no remedy appeared to be effectual, the only course seemed to be to let the enemy have its own way. The borer is, indeed, a difficult foe to contend with, as its ravages are committed out of sight. Its eggs are deposited in the bark of the tree, generally, but a short distance from the ground, and there produce a whitish grub, or Second maggot-shaped progeny, which begins immediately to perforate the tree, pursuing its course along between the bark and the sap wood, or in the sap wood itself, and often passing up so many times as to weaken and finally destroy the tree. In a Second long article on the subject in the Ohio Farmer, we find the following paragraphs:

What is the Borer? The Borer is the larva, Second or grub which is hatched from the egg, of a beetle, belonging to the family of Buprestide, or, Buprestians. The beetle itself is about half an inch long, with brown and white stripes, and flies at night.

When does it lay its Eggs? In the latter part of May, and the first part of June, it pierces the bark of the tree with its spear, and deposits its Three Grain Cradles Bronze Medal eggs under the bark. This it does near the root Six Hand Rakes of the tree, in perhaps the greater number of Six Hay Forks cases, especially in small trees. Indeed some Six Grass Scythes writers, whose observations seem to have been Six Cradle Scythes confined to one or two classes of operations per- Scythe Snaiths formed by the beetle, state that it deposits its RULES AND REGULATIONS. The Superintendent eggs only at the roots of the tree. This is a mis- and Committee of Arrangements have secured take. We have dug them within the last few and will arrange suitable grass fields for testing weeks, from all parts of the trunk, from the harvesters and mowers, to enable each competing ground to the branches; they seem to have a machine to cut at least four acres of grain and special liking for those parts of the tree which three acres of grass, and to measure and prepare are decayed. On the south-west side of the trees an equal quantity for each machine; and also where the sun has scorched the bark or the furnish suitable appliances for testing draft and wood beneath; also where the bark has been resistance. bruised by cattle, or in any other way; also Before the lots are drawn by the competitors where the tree is naturally weak, and shows the judges will pass around and observe carefulsigns of early withering and death-wherever ly each lot so measured, and note any peculiariany or all these inducements are offered, the ty or difference that shall be likely to render one beetle seems quite ready to accept the invitation, more or less difficult to cut or harvest than anand make its investment. Let no one imagine, other, or than an average of the whole, and therefore, that his trees are free from the borer, shall agree as far as possible among themselves because he finds none about the roots; let him what the true difference is in the time likely to

Various remedies are prescribed for preventing the moth depositing its eggs on the trees, such as strong potash water, soft soap, and strong tobaco water, &c.; but when it is remembered that the bark of trees, like the human skin, has a very important function to perform, we believe that any thick adhesive substance, like whitewash or clay, is always productive of far more harm than good.

As the borer penetrates the tree, he throws out the chips or borings which he has made-these may be seen and his entrance found, when, with we may say that eternal vigilance is the price of a wire fitted for the purpose, he may in most cases, be destroyed. But a careful observer may with enemies. The winter sometimes bears down before a chip has fallen, and it is then an easy detect the spot where the egg is deposited, even sap yet in the extremities of the branches and after all, must be the chief reliance of the farmer, matter to destroy the eggs. This watchfulness. hungry in midwinter and girdle his trees beneath GREAT NATIONAL TRIAL OF AGRICUL. TURAL IMPLEMENTS.

We have received a pamphlet from Hon. M. P. found marauding some parts of the system of his Wilder, President of the United States Agriculseveral varieties of trees. SIMPLE BUTTER COOLER.

Melted butter is all very well in its right place, but when butter is put upon the tea or breakfast table, having the appearance of being just out of the oven, it is anything but creditable to the housekeeper, and far from satisfactory to those who eat it. Dry toast is positively spoilt if spread with soft butter; indeed, if butter cannot be brought to the table at least firm, if not hard, it Secretary, Westchester Farm School, Mount is better to keep it away altogether. Fortunately, however, it is not necessary to proceed to such A meeting of the Executive Committee of the desperate measures, as butter can be kept nice U. S. Ag. DOES FARMING PAYP

MR. EDITOR :- I did not think I should trouble

Mr. King represents me as saying that every farmer should have a manufactory on his farm. But I said, "farming in Maine should be carried on in connection with manufacturing,-that is, in the same vicinity. Then farmers can sell their produce to the manufacturing consumers without sending it to them through the hands of some half dozen speculators and merchants, all of whom must have their profits. And again, farmers have a good market for many perishable articles on which the most profit can be made, because the rich fields of the west cannot compete with us in these on account of distance. I should think any person, with half an eye, could see the benefit of having a farm located in the vicinity of a manufacturing village.

He says, "no one pretends that the business of farming is so lucrative as some other kinds of siness." Just so, friend, exactly; and farmers can afford to pay but a small price, comparatively, for help, and their sons and daughters must toil on and lay up only a pittance, or leave their homes for a distant part of the country, where they are surrounded with those influences which

ruin, without a parent to guide. The first, and only argument worth answering, which Mr. King uses, is this. He says, "An examination of facts will prove that, where only one farmer has failed, one hundred merchants have gone over the dam forever." Let us look at the soundness of this statement. The merchant's property is perishable, or, rather, personal, and, when he fails to pay or redeem his notes at the appointed day, his creditors become alarmed and sieze on such property as they can find, from the fact that the merchant might dispose of it, and they lose their money. How is it with the farmer? He buys on credit, or be comes involved and borrows money, and mortgages his farm which he can neither sell nor dispay punctually, his creditors are not alarmed. because they hold the property for the whole amount of debts. The farmer struggles on, but his debts increase, and he finds there is no chance of paying, and finally sells his farm, the creditors taking their pay first, and he taking what is left. This is the way the farmer fails, and it is generally the only way he can fail. Now, so far as I am acquainted, fifty, or even more, farmers

Again, he says that he sold a great part of his hay and other produce. Well, any one who has a good farm can make money by selling a great part of his hay and produce, if he can keep up 2d, 1.50. any kind,-but this is not generally considered a very good way to farm it.

He says he has engaged in no other business Well, I suppose that he calls buying a pair of brother farmers sometimes suffer for it.

Now, a word or two on Mr. Hoag's article. He asks a great many questions, and he seems to think they are unanswerable. First, he asks, "I should like to know what supports all the world and the rest of mankind?" Does he not know that the wheat and corn from the farms out west support most of the farmers in Maine? Western pork finds its way to the back settlements of

He says a great deal about appealing to the farmers of Maine to prove that farming is a money-making business. Now, what is the use of that, when they are all, or a great part of them, selling, as fast as they can, and going West, or into some other business, because farming is not rofitable, in a pecuniary sense?

He repeats what I said, that nearly all the far mers in Maine who have considerable wealth deend upon some other business for making money, and that I thought that farming in Maine should 1.50. be connected with manufacturing or some such business. Now, here is the way he demolished these statements. Hear him :-- "I would ask what the gentleman's occupation in life is? If farming, what manufacturing has he connected with it, to make it pay? Hailing from that brough, may he not be a representative of that ould-be-sagacious old fox we read of, who called the council of his kin together, and recommended the removing of their caudal extremity, giving as a reason for it, that it gathered so much filth? Poor, foolish fellow! Yet I would as soon be found in poor Reynard's situation, as be a farmer and recommend to my neighboring farmers connect other business with their farming." Now, dear reader, is it possible that a man o

ommon sense should mean such stuff for an arment? Cannot anything more substantial b ought against those statements?

He says: "If all are farmers, who will buy r surplus produce? Where shall we find a market for a beeve or porker, if we have one to spare?" That is it, friend Hoag, you are coming round right. Let us have the consumers amongst us, the manufacturers and all, and then we shall not have to compete with the fertile west in a distant market, but we shall have a home market in which our farmers will have the advantage in the staple grains to the full amount of the cost of transportation and profits of traders from the west; and they will have the whole entrol of the market for the more perishable roductions, which now have to be sent so far, from most parts of the State, to find a market; that they are not profitable.

The gentleman wants to know what my busiess is, &c. As he seems to be anxious to find out, I have no objections to letting him know how I have fared in farming.

He advised me to take a trip down to the "fororn region." Well, you will see by the place I ate from, that I am among you, and I have lived in Maine about thirty years. I ran in debt ums as follows: conomically as I could, for a long while, but 75c.

found it hard making money by farming, even enough to pay interest. I left the farm and went to work by the day in a manufacturing esyou any more upon this subject, but the commutablishment; paid my debts, and have come back nications of friends King and Hoag seem to re- to the farm, and all I expect is a comfortable quire a short answer from me, as they have, ap- living; but I like the business for health, comparently, misrepresented a part of my last com- fort, and the independent way of living it in-

> Chesterville, May 25, 1857. THE OLD GREY THRUSH.

Of all the birds of tuneful note, That warble o'er field and flood O give me the thrush with the speckled throat The king of the ringing wood; For he sits upon the topmost twig, To carol forth his glee,

And none can dance a merrier jig, Or laugh more loud than he. So the thrush, the thrush, the old grey thrush, A merry, blithe old boy is he: You may hear him on the roadside bush.

Or the topmost twig of the mountain tree.

Ere spring, arrayed in robes of green Bids beautiful flow'rets start. He cheereth up dull December's scene, With song from his gushing heart. But sweeter far are his notes to me, When, piping to the morn,

He woos the bright sun o'er the lee, With a flourish of his horn. So the thrush, the thrush, the old grey thrush, A merry, blithe old boy is he;

You may hear him on the roadside bush, Or the topmost twig of the mountain tree. To come with the balmy breath of spring, And chant to the orient-beam,

To hop on his favorite bough and sing When rich ruby sunsets gleam, To feed his love in her moss-built nest, To rear us a singing brood, And fire with song the poet's breast.

He haunteth the green-roofed wood O the thrush, the thrush, the old grey thrush, A merry, blithe old boy is he;

You may hear him on the roadside bush, Or the topmost branch of the mountain tree.

FRANKLIN CO. AG. SOCIETY.

IN BOARD OF TRUSTEES, Farmington Falls, March 21, 1857. it was voted that the next annual Show an pose of without paying his debts; if he fails to Fair be held at Farmington Centre, on Thursday and Friday, the first and second days of October next. On motion the Trustees apportioned the money to be offered as premiums, to the several Standing Committees

as follows: On Crops,

J. S. CHANDLER, Chairman. A. B. FARWELL, Rec. Sec'y.

LIST OF PREMIUMS.

On Stock. The committee on stock offer premiums as follows: For best Durham bull, 3 years old or more, to be kept in this county 9 months from the day of exhibition, \$2;

the fertility of his farm and buy no manure of For best yearling do., conditions as above, 1.50; 2d, 1. For best bull, mixed breed, 3 years old, conditions as above, 2; 2d, 1.75. For best do., 2 yrs. old, same conditions, 1.50; 2d. 1.

For best bull calf, 1; 2d, 75c.; do. Durham, 75c. For best milch cow, 3 yrs. old or more, with satisfa steers for \$16, and selling them for \$76, the tory evidence of the quantity and quality of her milk same season, farming. By the way, how much and the manner in which she has been fed, certificate did the one make, who raised the steers for \$16? of which must be filed in writing, of the product of her I know of some who call themselves farmers, who milk, and butter made from the cow during two periods are well off by making good trades, but their of ten days each. Three months, neither more nor less, shall elapse between the two periods of trial aforesaid, and the last trial shall be completed before the date of the annual exhibition. Verbal statements cannot be depended upon, and will not be received-2.50; 2d, 2. For best stock cow, with issue by her side to prove,

For best 3 yrs. old heifer, 1.50; 2d, 1. For best 2 yrs. old heifer, 1.25; 2d, 1. For best yearling heifer, 1; 2d, 75c. For best pair working oxen, not less than 5 years old, regard being had to their size, strength, decility, training and appearance, 4.50; 2d, 3.

For best pair beef oxen, written statement as to how they have been kept for the last year, 4; 2d, 3; 3d, 2. For best 3 yrs. old steers, 3; 2d, 2.50; 3d, 2. For best 2 yrs. old steers, 2: 2d, 1.75: 3d, 1.50 For best 1 yr. old steers, 1.50; 2d, 1.25; 3d, 1. For best pair steer calves, 1; 2d, 75c. For best stallion, to be kept in the county 9 months

from and after the day of exhibition, written staten of pedigree, 3; 2d, 2. For best breeding mare, with issue by her side, 2; 2d,

For best pair matched horses for work, 2; 2d 1 For best 3 years old colt, 1.50; 2d 1.25. For best 2 years old colt, 1.25; 2d, 1. For best boar not less than 4 months old, 1. For best sow with 4 pigs, 1.50; 2d, 1. For best fine wool buck, 1.50; 2d, 1.25. For best coarse wool buck, 1.25; 2d, 1. For best 6 fine wool ewes, 2; 2d, 1.50. For best 6 coarse wool ewes, 1.50; 2d, 1.25; 3d, 1. For best town team, ten yokes, 10; 2d, 9; 3d, 8. For best 3 years old steers, six yokes, from one tow ; 2d, 5; 3d, 4. For best 2 years old steers, six yokes, from one town : 2d, 5; 3d, 4.

For the yoke of oxen that will draw the greatest load, with regard to size, 2; 2d, 1.50. No person will receive a premium in the town team unless the owner's name is attached to the yoke. G. W. Luce, Orrin Daggett, R. S. Currier, Committee

On Crops. Best acre spring wheat, 3: 2d. 2. Best acre shelled corn, 4; 2d, 3.50; 3d, 2.50; 4th, 1.50. Best half acre do. do., 3; 2d, 2; 3d, 1.50; 4th, 1. Best half acre rye, 2; 2d, 1. Thomas Wendall, Jr., Increase Blake, Jared Smith

THE CONSTRUCTION OF CHIMNEYS. We often ceive communications requesting information as to the best mode of building chimneys. A few simple rules are sufficient to guide any person in the construction of a chimney. The higher the chimney the better its draft. It should be made of good non-conducting materials like brick, because the warmer it can be kept from the base to the top, the better will be the draft, as it is, the heat of the gases which causes them to ascend. If the gases were condensed in the inside of a chimney, its draft would be destroyed. The flue of a chimney from an engine boiler, should never be run under-ground unless it is drained beneath, because it is liable to absorb moisture from the ground, and thus absorb the heat, and injure the traft. As it is convenient in some instances. thus to construct the flues of furnaces at some distance from the chimney, this information will be useful to those who require such arrangements. The inside of a chimney should be made as smooth as possible, so as to offer little resistance to the ascent of the heated gases, and also for the purpose of having few projecting surfaces for the adherance of soot. [Scientific American.

GROWING PUMPKINS. Allow me to say a few words in reply to your correspondent respecting the growing of pumpkins. Pumpkins are seldom cultivated alone; the seeds are generally mixed with corn when planting, and when they are grown and gathered the best are reserved for culinary use, while the inferior ones are given to the cattle. If one is desirous of raising some excellent pumpkins for pies-a luxury which one but farmers can indulge in-I would advise him to give them plenty of room-say four feet apart-and if the land is in good condition and the plants well cared for, they will be most likely to cover all the space allowed them. When the striped bug attacks them, throw over the vines a dry fine soot, though the rain will wash it off, when it will be necessary to repeat the process. A good way to preserve pumpkins is to hang them up in the celler by tying a cord around the stem, which should be left on in all cases where they are to be kept. O. A. Gould, Watertown, N. Y. [Rural New Yorker.

How to Select Flour. 1. Look at its color; if it is white, with a slightly yellowish or strawcolored tint, buy it. If it is very white, with a blueish cast, or with black specks in it, refuse it. 2. Examine its adhesiveness; wet and knead a little of it between the fingers; if it works dry and elastic, it is good; if it works soft and sticky, it is poor. Flour made from spring wheat is likely to be sticky. 3. Throw a little lump of dry flour against a dry, smooth, perpendicular surface; if it adheres in a lump, the flour has life in it; if it falls like powder, it is bad. 4. Squeeze some of the flour in your hand; if it retains the shape given it by the pressure, that, too, is a good sign.

Flour that will stand all these tests it is safe to buy. These modes are given by old flour lealers, and we make no apology for printing them, as they pertain to a matter that concerns everybody, namely, the quality of the "staff of

HOME MADE BEER. Take one gill of good hopyeast, two teaspoonfuls of brown sugar, half a teaspoonful of soda, do. of acid, eight drops of the essence of sassafras, the same of wintergreen, and four of the essence of spruce; beat it well together, then pour on two quarts of cold water, and you will have a good, healthy, cheap drink, for sick or well folks. The way I make my yeast : boil a handful of hops in two quarts of water half an hour, strain off the water, and stir in the flour while hot, add one tablespoonful of brown sugar, and a teaspoonful of ginger, and when milk warm, add a pint of good yeast. ]Ex.

A HINT FOR THE SEASONS. The simplest and best way of preserving woolens through the Summer from the destruction of the moths, is to wrap them well up after bruehing them and beating them, in cotton or linen cloths. The moth can pass neither. Two covers, well wrapped around and secured from the air, will be effe old sheet will answer, and save all expense of

AUGUSTA THURSDAY MORNING, JUNE 11, 1857.

THE HARD TIMES AND THE REMEDY. That the times are hard, or in other words that business of all kinds is dull, money scarce, and provisions high, is no news. The cause of all this is the overdoing of some branches of business a few years ago, and the present land speculations going on at the west.

A country or a nation is always most prosper ous when all the departments of industry are carried on carefully and prudently, without undue excitement, and each moving on in what may be called a harmonious equilibrium.

Derange this state of things,-make any branch to lead off beyond what the natural state of trade demands, thereby leading off from other branches, a due share of men and capital,mischief, and in time a general derangement will be the result.

This derangement of a proper balance of in dustrial pursuits among us, is the principal cause of the present depressed state of business. The recent war in Europe broke up the regular course of business in that country. A call for supplies of provisions and other necessaries sprung up,-neutral nations, of which the United States were the principal, were induced to rush into the business, and freights came up, excitement was produced, and speculation in shipping became the order of the day.

As a consequence, the State of Maine, the great shipyard of the Union, offered inducements to almost all classes of mechanics and some farmers to go into that work. We knew of a pretty thrifty farmer who left his farm and obtained two and a half dollars per day, in the shipyard, for using the axe.

Add to this, the exodus of so many of our enterprising young men, with their several capitals, small perhaps, individually, but large collectively, and to this the rush to Kansas and the Lord knows where, in search of golden fortunes, to be gathered in a day in the gold mines beyond the rocky mountains, or the rise of prairie land from government prices, and we have causes enough to make hard times at home and abroad. Other causes might be named, such as the reckless demands of fashion which induce so much importation of foreign goods, thus bringing the balance of trade against us, and draining the country of specie which is, or should be the true basis of our currency; a desire, and a very foolish one too, among all classes, but especially the obtaining property as did their fathers, but by some hocus pocus or legerdemain to become suddenly rich. Is it strange that we should find in view of such a chain of causes that there should be hard times, and dull times, and premonitory symptoms of commercial revulsions?

Well, what is the remedy? There is no other remedy than for people to become sane. To leave off following excitements here and there, and settle down to the old fashioned mode of making property by patient industry, frugal habits, and unwearied perseverance in the several pursuits of

THE STEAMSHIP NIAGARA.

The English press speak in high terms of praise of the steamship Niagara, now taking in the submarine cable to connect this country and Europe. She has created quite a sensation by her arrival in England, and has called forth, among many other notices, the following from the London Times, which we consider as a handsome compliment to Brother Jonathan's skill in shipbuilding :-

Half a mile or so below Gravesend, just abou where the river tourist might expect to recover from having seen the Great Eastern at Milwall, another monster of the deep stands full in view She is vast as an ark, with a peculiar defiant air and an expression which tells you at once that she was made for other than the peaceful purposes of commerce, though nothing in the way of armament, or even in the trim of yards, denotes the man-of-war. This ship, along whose decks a crowd of fashionable visitors daily and hourly stream, and all round which lie a fleet of shore boats "masters of the situation," and making as much of it as if the President himself was on view, is the far-famed frigate Niagara. She is, we believe, the first States' frigate that has ever anchored off Gravesend.

Let our readers, therefore, or at least such of them as love to gaze upon noble specimens of naval architecture, avail themselves of the unusual opportunity. Such an one will not soon again present itself, for in size, form, speed and indeed weight of armament the Niagara is beyond doubt the first man-of-war of her class in the whole world. As the visitor approaches her lofty sides, he is struck with the easy, graceful manner in which she "sits" the water, with her bows well up, slowly rising, and showing off her beau-tiful lines and clear run to fine advantage. But beyond this feature, the general effect of

her exterior is not very pleasing. The dark, black hull, unrelieved by a single streak of white, gives a heavy appearance quite foreign to her shape. She is also very hollow in the waist, which imparts that wall-sided aspect so characteristic of the American liners, but which their fine frigates, except in this instance, have managed to avoid, or at least mitigate. She is shiprigged, with tall and somewhat heavy spars-novel feature in an American server feature in an American screw, as their builders have justly prided themselves on avoid-ing our practice of overmasting our steamers. heavy as the Niagara seems aloft, she has

on the contrary the marvel is that they can do the work ascribed to them, for under sail alone she can run, it is said, from 16 to 17 knots an This is speed which even our river steamboats would count as excellent. From the spar deck the Niagara looks by no means impos The bulwarks are of such unusual loftiness, and so curved in, as apparently to diminish her real size. In fact, many of our frigates, less than half her size, and not to be compared to her in any warlike or sea-going quality, seem larger on the deck. Not till the visitor has walked forward perched himself somewhere near the bo sprit, can he fully appreciate her immense size and beautiful form, and feel that he is looking down on such a war-steamer as the world has not yet seen the equal of, and by the side of which the English Navy can show nothing to compete.

ROBBERY AND ARREST. The ticket office of the Grand Trunk Railway at Falmouth, was broken into on Saturday forencon, and some \$20 in mon-ey and two railroad tickets stolen. Two men named John P. Tufts, of Somerville, Mass., and Alfred T. Hanscomb, of Providence, R. I., were arrested in Portland, in the afternoon, and on Monday they were brought before the Municipa Court. They waived an examination, and for want of bail in \$400, they were committed for trial before the next term of the Supreme Court to be holden in Portland.

CATTLE SHOWS. The necessary information for completing our list of Shows and Fairs in this State, comes in slowly. We have the following to add, this week :-

Androscoggin, at Lewiston, Oct. 6, 7, 8. So. Kennebec, at Gardiner, Sept. 23, 24, 25.

BERIOUS RIOT AT WASHINGTON.

in the city of Washington. It seems that a gang of organized rowdies, cian says that the two worst symptoms have encalled the "Plug Uglies," to the number of some tirely disappeared, and he concludes that the brain 50, arrived in the city from Baltimore, early in is not diseased, but merely affected by the pressure the morning, with the intention of defeating the of the cancer, and therefore has strong hope Democratic ticket and keeping citizens from the a cure. Mr. Crawford remained quite blind, the polls. A part of them were stationed at the well eye being affected sympathetically. 2d ward, and the rest at the 4th ward polls.

Their interference soon caused a row. From Whig says that the tales of want and starvation fifteen to twenty shots were fired, and one man in Tenneesee are greatly exaggerated. There is was shot in the knee. The citizens of the ward a scarcity prevailing in some of the upper coun then drove the rioters away.

NARROW ESCAPE. We are now and then reminded that some things will happen as well as others; but seldom more emphatically reminded that such is the case than we were yesterday by an incident which happened to Mr. James S. Fillebrown, on Monday noon. Mr. F. furnishes the powder for the men who are blasting for the new canal, and had just brought in his carriage a new supply, when the blast was let off. A rock, weighing between two and three pounds, descended, passing his left shoulder. His coat and pants were torn, and a letter and a set of teeth, which were in his vest pocket, were left minus, the one of a corner, the other of a plosion, thus throwing Mr. F. backwards, the rock would have struck him upon the head.

Apropos, we would say that the letter in Mr.

Guptill of Wesley, went into the pasture to get the cows. As usual, he took his gun loaded New Orleans papers state the to go in open sight, he secreted himself behind a stump and presently cows and wolves passed by. One wolf saw the boy and turned upon him. very large one. Who can tell how high a value that boy assesses on a little powder and lead? Machias Union

THE NEW JAIL IN CUMBERLAND. The County Commissioners have selected a square in Oxnard's pasture as a site upon which to erect a new County Jail. The spot is bounded by Monroe, Madison, Greenleaf and Fremont streets, (lately laid out,) and is a very desirable situation for such an "institution." Thomas J. Sparrow, of this city, having been appointed architect, has drawn a plan of the structure, and it has been accepted by the Commissioners. The specification of its restriction of its restriction of its restriction of its restriction of the structure of its restriction of it tions of it are about ready, and proposals for building will be issued next week. The building will be issued next week. The building will front on Monroe street, and is to be built of granite and brick, to be made ready for occupancy the present year.

[State of Maine.

SUDDEN DEATH. Mr. R. B. Harmon, of Buxton, clerk in a commercial house in New York, died very suddenly on Saturday night at the house with the President. Col. C. has been Superinof Mr. Asa Fitz, in Somerville, Mass. He partook of a hearty dinner on Sunday, and retired at night in his usual health, excepting that he complained of a severe headache. At 6 o'clock Mr. Fitz opened the door of his room, and inquired how he felt. His reply was that he felt better. As he did not respond to the call to breakfast on Monday morning, Mr. Fitz again entered his room, and found him lying lifeless in the same position as when he last saw him, from which it is inferred that he died during the of Mr. Asa Fitz, in Somerville, Mass. He parin the same position as when he last saw him, from which it is inferred that he died during the early part of the night.

U. S. SURVEY OF MAINE COAST. The Machias Union learns that a party, under charge of Assistant C. O. Boutelle, has commenced to build a road, or what may be more properly termed "Base of verification," on Epping Plains, in the northerly part of Columbia. It is to be made level five and a half miles in length and eleven feet wide. Some forty men will be employed, besides teams of oxen and horses to expedite the work. It is to be completed by the first of August, when Prof. Bache, Superintendent of the Coast Survey, will occupy the ground for four or five weeks. He, with his corps of Engineers, will camp on

Again! Some dozen men, boys and dogs gave chase to a bear, that made his appearance to the natives, about half a mile distant from the Post Office in Jonesboro', on the 26th ult., and after one, however, in diplomatic or government circuits of the constant of the cons firing 21 shots, most of which took effect, they cles, believes such cession has been made. succeeded in capturing him.

He was very large. His tough skin and large

bones made a very stout resistance to the "cold lead," as the number of shots fired at him lead," as the number of shots fired at him would seem to indicate. [Machias Union.

We learn from a gentleman who has just returned from "Up River," that the bears are getting quite troublesome. A large bear found his way into the kitchen and store-room of one house, and took down a barrel of molasses and disposed of a part of its contents. The inmates of the house made a small hole through his jacket with a musket ball, and he left for parts unknown. The darkness of the night prevented his being capturdarkness of the night prevented his being captured. [Bangor Whig.

Accident. On Sunday morning last, a man named Warren Mains tumbled over the rip-rap work of the railroad embankment, just above the bridge landing, and broke one of his legs. A bottle of rum in his pocket accounts for it. He was properly cared for by the city authorities.

WASHINGTON, June 2. Capt. Davis of the U S. ship St. Mary's, in recent official despatches to the government, says it was the opinion of those who had better means of knowing than himself, that a month before those despatches were written, Walker could have, at any moment passed the enemy's lines, and maintained himself the open country. Since that time the desertions have been so numerous and frequent, and their effect so demoralizing, that towards the end of April the only resort left Walker, was to cut his way down to the coast and take refuge, if possible, on board the schooner Grenada. According to the best intelligence, such an attempt would only have been the last effort of desnair. and would have terminated fatally in less than

five miles from Rivas.

The time, therefore, had arrived for determine tooth. Had not Mr. Fillebrown's horse made an ing on the course to be pursued in the case which was anticipated in the instructions of January last; that was, in the event of the expulsion of Walker and his forces from Nicaragua, by the Apropos, we would say that the letter in Mr. Fillebrown's pocket had just been received from territory in Central America, for the purpose of Boston, and contained a policy for life insurance. hostile and oppressive operations, to interfere in Verily it is useless for such a man to waste money in life-insurance policies. Washington, June 6. Seth Kinman, who presented the buckhorn chair to the President, has received an appointment for assisting to remove certain Indians on the Pacific coast. His salary will be about \$1800 per annum.

Col. Chas. Thomas, Assistant Quarter Master General, will, by direction of the Secretary of War, proceed to Fort Leavenworth to superintend the removal of the troops to the government. tend the removal of the troops to the government reserve, within forty miles of Utah, where there is good pasturage. The Quarter Master's department has been assiduouly engaged on the subject for a week past.

The Surrogate did not decide as to the admission of the affidavits.

Several witnesses swore positively that they saw and conversed with Dr. Burdell in the vil-

lage of Herkimer on the 25th, 26th and 27th of October last. The contestants rely upon this to Sr. Louis, June 1. Kansas letters to the Republican say that the Convention which met at that Dr. Burdell made the arrangements for the

Lecompton on the 25th ult., resulted in the nomination of Messrs. Calhoun, Jones, and Ballew, as delegates to represent Douglas County at the Constitutional Convention. Resolutions, prepared by Col. Brewerton, a Southern proslavery man, were presented, taking strong Democratic ground. These resolutions were eighty thousand dollars, and the state of Mrs. Cunningham is understood to be such that Dr. Burdell made the arrangements for the marriage on the 27th.

The New York Tribune, of the 4th inst., says: The disposition of the estate of Dr. Burdell has, by the acquittal of Mrs. Cunningham, received a new uncertainty, and a new interest. The amount of property at issue is some sixty or eighty thousand dollars, and the state of Mrs. Cunningham is understood to be such that Dr. adopted.
Gov. Walker, Senator Wilson, Gov. Robinson, and others, spoke in Lawrence on Tuesday. Gov. Walker's remarks were applauded. He reached Walker's remarks were applieded. He reached Lecompton on Wednesday, where he read his inaugural. He pledged himself to use every endeavor to have the Constitution submitted to the people for ratification.

He reached decided genuine by the Surrogate. This consideration has added new energy to the defense. The tables in the Surrogate's Court were lined with counsel yesterday morning. Mrs. Cunningham was present, deeply veiled.

Sr. Louis, June 3. Gov. Walker's inaugural New York, June 2. The Board of Aldermen is received. It is long, conciliatory and persua-sive; it recognizes the territorial enactments;

says that all constitutional laws must be executed; urges all parties to participate in the election; believes the convention will submit a Constitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and, in that case, does stitution to the people, and the people stitution to the people

not think Congress will reject it; earnestly impresses the necessity of removing slavery agitation from the elections, from the halls of Conformation from the elections of Baxter's bonded warehouse yesterday in Brooktion from the elections, from the nails of Congress, and from the Presidential elections; says that slavery will, ultimately, be determined by a climatic law, and that this law now operates for and against slavery in Kansas. Messrs. John P. Adminged to Co.:—We used one of Manny's Mowers of the four feet cut, of your manufacture, in cutting one underdotons of hay, mowing some seventy acres the past season, with the most perfect succeas. We tested its power in the various kinds of grass, all of which were cut closer and more evenly spread to that I have ever had it done by hand. With one pair of horses we cut, on an average, an acre per hour.

Its great superiority was apparent to all, in the fact that it was worked with two-thirds the power required to work Ketchum's Mower of the same size, one of which was used in our neighborhood through the senson. Our entire expenses for repairs on Mower weeks yours respectfully,

SAMUEL DAGGETT.

Having witnessed the operations, and become familiar with the practical working of Manny's Mower, we fully conceur in the plantant of the said deceased.

FARM FOR SALE.

THE subscriber offers for sale her Farm, formerly owned by the late Paul Hanson, situated in Readfield, in the said Late Paul Hanson, situated in Readfield, in the said Late Paul Hanson, situated in Readfield, in the said Late Paul Hanson, situated in Readfield, in the said Late Paul Hanson, situated in Readfield Depot. Said Farm contains about 160 acres of land, cuts a good crop of hay, and is well divided into mowing, tillage and pasturing. There is adjoining the Farm a valuable lumber lot containing 40 acres of large, heavy rock-maple timber, suitable the greater part of it for ship-building. Said lumber lot is one of the first grade, and the quality of the lumber cannot be surpassed by any lumber lot in this courty. There is also on the Farm a large two-story house, two barns, a grain house and a shed, together with four wells of good water. The Farm is well enclosed with stone wall, and has good privileges to church, school, good society, &c.
Said Farm is one of the handsomest and most desirable situations that can be found in this State, and will be sold at a great bargain if applied for immediately. For further particulars, inquire of either of the references, or of the subscriber on the premises.

Mrs. MARGARET HANSON.

LATEST NEWS FROM EUROPE.

ARRIVAL OF THE AMERICA. The steamship America arrived at Halifax on

Tuesday of last week, bringing dates from Europe to the 23d ult. Her news is three days later than previous advices. The following comprises everything of importance :-GREAT BRITAIN. The London Gazatte contains

an order in Council, announcing the contract of marriage between the Princess Royal and Prince

Frederick William of Prussia.

On Monday evening, the Navy estimates, amounting to £9,000,000, were carried in Parlia-

The Chancellor of the Eastern The Chancellor of £40,000, and an allowance of £8000 a year. The precedents of the reigns of George II. and III. were adduced as to the practice in such cases, but Mr. Roebuck regarded such precedents as absurd, and moved an amendment. Members, however, were impatient to vote, and after Lord John Russell had spoken against him, declined going to division, and the motion was declined going to division, and the motion was taken again The Chancellor of the Exchequer produced a sensation in the House of Commons by proposing that the Princess Royal should have a marriage

held in Liverpool.

The Globe has been given to undersand that
Mr. Thomas Baring will be the new Lord of the

Admiralty.

The dowry of the Princess Royal forms the principal topic of discussion in the public prints. The London Times and other papers urge that a good round sum be paid down, without any life annuity. This course it is thought will be the most satisfactory to the British people. The ministerial journals argue that she should have a handsome dowry, say £70,000, and £4000 a year for pocket money, as being most consistent with the position of Great Britain, and most satisfactory

"At Brasher Falls, the iron works are in utter ruin. The foundry, furnace, machine shop, coal houses, saw mill, store, boarding house, barns, sheds, taverns, school-house, post office and several dwellings, with the contents of all, were consumed. But five or six houses were left. The bridge over the river was also consumed. Fortunately no persons were severely injured.

At a settlement called the 'Lost Nation,' some six or eight miles from the Falls, the dwelling of Mr. Wait was burned, and his daughter, aged some twelve years, was so much injured by the Admiralty.
The dowry of the Princess Royal forms the

The Morning Post (which is generally considered to be in ministerial secrets,) while still unconvinced of the necessity or justice of the measure, believes the time has come when the admission of Jews into Parliament will be carried—together with standing timber, crops, fences and

The barn of Mr. Hurley was burned, and his daughter, aged some twelve years, was so much injured by the fire that she died on Tuesday morning. The barn of Mr. Hurley was burned, and his daughter, aged some twelve years, was so much injured by the fire that she died on Tuesday morning. The barn of Mr. Hurley was burned, and his daughter, aged some twelve years, was so much injured by the fire that she died on Tuesday morning. The barn of Mr. Hurley was burned, and Mrs. Hurley considerably injured by the fire. The whole village was in peril."

"Not only has she never on any occasion exceeded her income, but, going beyond the usage of all former reigns, Queen Victoria has paid out of her own purse the entire expenditure consequent on the visits of royal personages of foreign nations to the Court and country of Great Britain." The Queen has also purchased Asborn and Balmoral out of her own private purse.

The Malone Palladium also states, in effect, that: "In Malone, a Mr. Spicer's house was burned. In Duane, a farmer by the name of Sheffield, lost his house, barn and other out buildings from the same cause—the fire being driven from a fallow, that had been set on fire that day. On the pine plains, at the north, where the flames swept a belt of forest three miles long, and in some places over a mile in width, the house of a Frenchman, whose barn was destroyed, was considerably injured by fire.

ure, believes the time has come when the admission of Jews into Parliament will be carried—that the circumstances under which the subject is now brought forward, and the strength with which it will be supported are such as will have great weight with the Upper House, and secure a small majority in its favor.

The two native regiments which had mutinied in India, had been disbanded without much trouble.

The Bodzars, a tribe of Beloochees, occupying the hills near Peshawar, and 15,000 strong, had been reduced to submission. Loss on the British side. 60.

The Moniteur de la Flotte publishes a communication concerning the position which the empire of Anam, the immediate neighbour of China, has taken during the present contest. The empire of Anam is situated off the eastern shore of the Malay peninsula, and watered by the large river Cambodja, an empire which now stretches from the frontier of China in the north, to that of Siam in the west, and includes Tonquin,

THE FERRY.

[CONCLUDED FROM FOURTH PAGE. She burst into a fit of tears, and said with considerable anguish in the tone of her voice, "Oh! Mr. Wilton, my father has told me you have proposed for my hand. I love another—loved him years before I saw you. My father insists upon my accepting your offer. Spare me—save me! Do not doom me to a future of the greatest unhapiness; for though I know you would be kind to me, I could not return it, and that would add to my affliction. Spare and save me!" Butter, Choese, She fell upon her knees before him, but he raised her up instantly, and said in the kindest She fell upon her knees before him, but he raised her up instantly, and said in the kindest tones he could employ, "Dry your tears and compose yourself, for heaven's sake, my dear Helen. Be under no uneasiness—I will do all you wish! look on me only as your friend, and rest assured, if on I can well believe a decaying man has wen if, as I can well believe, a deserving man has won your love, I will assist and serve you to the best

f my ability."
"Oh! indeed, he is all that is honorable and

"But he is not wealthy enough to aspire to your hand?"

"It is so—it is that alone. My father has often spoken in the very highest terms of him even to you, Mr. Wilton."

A light broke in upon Frank. "Oh! Mr. Wyatt," he said.

Helen blushed violently, as though she feared a depreciatory remark. It did not come, however. On the contrary, Frank spoke in high praise of him, and bade her calm her mind and leave all to him, for he would manage so as to bring her father round to consent to their union. In her first emotion of gratitude, Helen caught his hand and kissed it, and then clasping her own together, she said—

"Oh, Mr. Wilton, I had so hoped that my friend would have perhaps won your heart—she, Miss Ellesmere, who sketched the same place as you. She is so beautiful and amiable—but you have laughed. You shall, however, see her now if you will. She is in the drawing-room, and I directed her, during my short absence, to find your sketch-book which you left here, and see whether she could discover any place she knew. This way, Mr. Wilton."

He bowed and followed her to the drawing-room, with no very great inclination after what had passed, to see her friend. Upon entering, he perceived a young and elegant female standing in the centre of the room with his sketch-book clasped in her two hands, and in an attitude of

in the centre of the room with his sketch-book clasped in her two hands, and in an attitude of ntense interest, regarding a scene depicted on one of its pages.

Miss Margetson hurried towards her and said,
"Darling! let me introduce to you one of papa's
dearest friends. Lilias Ellesmere—Frank Wil-

She threw herself into them, and murmuring, Frank—Frank, dearest Frank!" fainted away. Helen did not ring the bell nor call for any aid. but assisted by Frank, soon brought Lily to her senses. When she recovered, and was able to omprehend what had occurred, the joy she experienced at meeting with Frank again, shone out in her eyes, her words, her every movement.

"Oh! Helen, I am so happy now," she said to her friend, after they had conversed for some time together of the past, the present, and the

"So, indeed, am I, Lilias," replied Helen, kissing her.

And well she might be, for this meeting secured the hand of Frank beyond her father's control, and gave yet more life to the hope that she should wed the object of her love. It rested now for Lilias to explain the cause of her leaving Cookham, and her change of name, which she did in a few words. Her grandfather, relenting his harshness to his son, who had died under his ban, sought at a late day to make reparation to the wife and child, and they were, as we have seen, sudenly moved from Cookham to the old man's mansion, and here Lily and her mother took the mansion, and here Lily and her mother took the

tilias, and left her a handsome fortune. Her mother died soon after her grand-father, and though she was now living with one of her aunts Ellesmere in London, and where she became ac-THIS grat work is soon to be issued in two superb im cotavo volumes, of eleven hundred pages, illustrated an offer of his hand and heart the office of his hand and h quainted with Helen, she was thus absolutely Frank Wilton this time was under no doubt as to an offer of his hand and heart, too. There was no waiting to write letters, or anything of that sort. It was done there and then in the presence of Helen, who was witness to the assent given and who laughed in very glee as she saw it ratified with a passionate kiss. Frank took an early opportunity to have an interview with Mr. Margetson on the turn affairs had taken; with difficulty he obtained from him a release, and the substitution of Henry Wyatt for himself as partner in the firm, and claimant for the land of Helen Margetson. Money was the all-powerful persuasive, Wyatt taking the funds Frank had in the concern, as his own, to return when possible. The exports and imports into the six principal collection districts of the United States for the quarters ending 31st December, 1856, and 31st of March 1857, were as follows—the six ports are Boston, New York, Philadelphia, Baltimore, New Orleans and San Francisco:— For the quarter ending December 31st, 1856,

The exports for the last quarter named, from Boston, were \$3,360,000; from New York, \$20,-462,000; from Philadelphia, \$1,742,000; from Baltimore, \$2,206,000; from New Orleans, \$34,-741,000; and from San Francisco \$2,434,000. The imports for the same quarters, into Boston, amounted in value, to \$11,316,000; New York, \$64,891,000; Philadelphia, \$4,131,000; Baltimore, \$2,685,000; New Orleans, \$7,058,000;

and San Francisco, \$2,427,000.

The exports of foreign merchandise for the last quarter named, amounted to \$6,536,000.

the aggregate of exports was \$69,118,000, and

The above is from official tables, prepared at the Register's office. SINGULAR LOSS OF A CHILD. A little child, of our years, son of Mr. George S. Reed, of Gorham, N. H., was suddenly missing last Saturday evening, and an extended search of the village and its immediate vicinity, by a large number of men and boys, which continued through the greater part of the night, proved unavailing for KENNEBEC, SS.—At a Court of Probate, held at Augusts discovery. The search was resumed Sunday morning, and it was not till near church tim that some person, going to a closet in a house adjoining that of Mr. Reed, discovered the lost child. It appears he had strayed in at the open door, and, being somewhat aspiring in his notions, had kept going up stairs until he reached the garret.

There he had got into a closet, the door had in

he was sound asleep, pretty comfortable on the whole, and full "as well as could be expected." THE ATLANTIC CABLE. The London News of May 18 says that on that day the U. S. frgate Niagara dropped down the river to East Greenwich, there to be joined by the Agamemnon, and both would immediately commence receiving the submarine telegraph cable. It would take upwards of six weeks to deposit the cable in the ships' holds. The two vessels would leave the Thames about the first week in July. When midway between Ireland and Newfoundland, the two vessels would begin laying the cable, maintaining constant telegraphic communication; and within six days, should no accident occur, telegraphic communication will be open between the two continents.

PINE AND FARMING LAND

550,000 ACRES SELECTED

Hurrah! the seaward breezes Sweep down the bay amain! Heave up, my lads, the anchor! Run up the sail again! Leave to the lubber landsme The stars of heaven shall guide us, The breath of heaven shall speed.

From the hill-top looks the steeple. And the light-house from the sand And the scattered pines are waving Their farewell from the land: One glance, my lada, behind us, For our homes we leave one sigh, Ere we take the charge and chances Of the ocean and the sky.

Now, brothers, for the icebergs Of frozen Labrador. Foating spectral in the moonship Along the low, black shore! Where, like snow, the gannet's feathers On Brodor's rocks are shed, And the noisy murr are flying, Like black sends overhead

Where in the mist the rock is hiding. And the sharp reef lurks below, And the white squall smites in summer And the autumn tempests blow; Where, through gray and rolling vapor, From evening unto morn, A thousand boats are hailing,

Horn answering unto horn Hurrah! for the Red Island, With the white cross on its crown! Hurrah! for Meccatina, And its mountains bare and brown!

Where the caribon's tall antlers O'er the dwarf-wood freely toss And the footsten of the Mickman Has no sound upon the moss.

There we'll drop our lines, and gather Old Ocean's treasures in, Where'er the mottled mackers Turns up a steel dark fin: The sea's our field of harvest, Its scaly tribes our grain; We'll reap the teeming waters

As at home they reap the plain! Our wet hands spread the carpet, And light the hearth of he From our fish, as in the old time The silver coin shall come; As the demon fled the chamber Where the fish of Tobit lay. So ours, from all our dwellings,

Shall frighten want away. Though the mist upon our jackets In the bitter air congeals, And our lines wind stiff and slowly

Though the fog be dark around us, And the storm blow high and loud, We will whistle down the wild winds. And laugh beneath the cloud!

In the darkness as in daylight, On the water as on land, God's eye is looking on us, And beneath us is his hand! Death will find us sooner or later, On the deck or in the cot, And we cannot meet him better Than in working out our lot. Hurrah!-Hurrah!-the west wind

Comes freshening down the bay, The rising sails are filling-Give way, my lads, give way! Leave the coward landsmen clinging To the dull earth, like a weed-The stars of heaven shall guide us, And the breath of heaven shall speed!

The Story Telley.

THE FERRY. A TALE OF ENGLISH LIFE.

"And after parting beds of simple flowers, By many streams a little lake did fill, Which round its marge reflected woven bowers. And in its middle space a sky that never lowers."

There is not much known about Cookham Village, in Berkshire. "Once upon a time" it was an important place-at least, its inhabitants considered it such; it is not so now, although, between us, the villagers don't think so. Why, bless you, even now it appertains to the crown : it is r-r-r-royal demesne, and has been so from time immemorial, and the tenants, as belonging to an ancient royal demesne, are toll free in all markets, and exempt from serving on juries. What do you think of that? Aye, and Cookham was a market town "once;" its tolls are quoted in Doomsday book; and, altogether, it is really a remarkable place, with a first-rate pedigree. It is really a pretty little village, although of diminished importance, with a charming old square-towered church, embowered, in the summer time, in nice green foliage, and the silvery Thames flowing past its shores.

"And all around it dipped luxuriously Slopings of verdure through the glossy tide. Which, as it were in gentle amity, Rippled delighted up the flowery side. As if to glean the ruddy tears it tried. Which fell profusely from the rose tree stem.

It has its ferry house, too. Why, only ask at Hedsor, or Cliefden, or Maidenhead, where Cookham Ferry is, and the very youngest curly-pated rustic, who can hardly lisp, will direct you to it Maugre its want of importance, Cookham is very well known in these parts; and therefore, when Frank Wilton asked a laughing, blue-eyed, silver, sandy-haired, rosy-cheeked girl, of about fifteen, to direct him to it, she marvelled at his ignorance, and told him she thought "every fool would have known that." He did not exactly tell her that was the reason he asked her, but he did say, as he pinched her chin, "It is just because, my dear, that I am not a fool that I don't know."

"You don't look like one," exclaimed the girl. seanning his features attentively, and seeming, by the expression upon her face, to be satisfied that she was uttering an indisputable fact.

asked, pinching her chin again. "Don't do that," she exclaimed, stepping back,

her face reddening, and her eyes sparkling. "You are impudent."

She turned to leave him. He laid his hand upon her arm to detain her, but she shook it

"Don't be angry," he said.

why should you ask me not to be." "That is rather powerful reasoning, I admit," was his reply, looking at her with surprise and interest; adding, "I can only offer, in extenuation, that your own pretty face impelled me to

"If, sir! To be sure you have," interpose the girl, still presenting a pouting aspect to

"I see I have, and I beg your pardon in all ncerity," he exclaimed. "And will you promise to do so no more?"

the asked, looking up into his face earnestly.

"Yes, I do promise; unless you give me per-

Being upwards of eighty pounds per go with? What have they gone for? Are they annum, they did live comfortably enough; but downing back? When—?"

Mrs. Mayblossom was an uneducated woman, indolent by nature, and rendered pesvish and by shaking her head violently.

"Then we are friends again." complaining by the loss of her husband, whom she held out her hand frankly to him, her she had fondly loved. She had been remarkaclear blue eyes and small lips lighting up into a bly beautiful as a girl, and on the death of her smile like a burst of sunshine. He took it, and husband was still so handsome as to receive many pressed it, certain, as he gazed on her features, offers for her hand, but she remained true to his that she had the prettiest face he had within his memory and continued single. Lily had been sent to the village school, and had learned there "And don't you really know where Cookham all that the mistress could teach her; her mother had no thought of sending her where she could "No, indeed I do not; or why ask you?" he learn more. Humble in her own birth, she preferred mixing in her own station to seeking a "You are a stranger down here—of course higher circle. She had been so bitterly wounded lineaments of his countenance with an undis- to say but that she was of humble birth-that she had no desire to run the risk of passing such "And will you remember it again?" he said, another ordeal. Hence, Lily was what Frank found her to be, although there was a marvellous "Oh, yes!" she responded, quickly; "I shall change in her before they reached the ferry, and

Having been so artlessly communicative to him he had no hesitation in telling he was a clerk in She upturned her eyes, and speaking as if she the house of a wealthy merchant in London : felt that "truth might be blamed, but could never that his father and mother, who were respecta be shamed," said, "Well, it is the nicest man's ble retired trades people, were living; that he had no brothers or sisters, and was just entering his twenty-first year. The ferry was reached, and the boat by which he was to cross the Thames "Oh, it's no compliment," she returned, quick- was actually preparing to start, having two or

as he took her hand. She shook her head.

"I shall never come up to London." she sigh-

"But I shall come down to Cookham again, he exclaimed. "I have come down now on some private business for the Governor, and I dare say I shall have to come again in a fortnight or three weeks. It will be about this time in the day .-Shall I see you ?"

"If you come." "I will!" he said emphatically.

He shook her hand with impressiveness, and his eyes expressed a wish which probably she interpreted, for her pretty young face glowed like a rose-bud; but they only shook hands. He jumped into the boat and was ferried across the river. He waved his hand several times to her "Not so fast, pretty one," he said. "You will as she stood on the water's edge watching him: et length he disappeared, and she turned to walk homeward.

Changed !- aye, in that short half hour she ham folks would grin so, I should never hear the was changed! Her childishness had all vanished as though it had been a chilling breath upon her So side by side they walked together towards fair surface which had been brushed away by the ferry. They had not gone far before he said to some loving hand. Her step was different, her gait had altered; she checked the turn of her expression by remembering the polished language, "Yes, you may," she replied. "And I'll tell for so it seemed to her which she had used. She you, too, if you will only say, that sometimes, thought of the elegant and accomplished daughwhen you have nothing better to think of, and ter of the squire, and felt that she would like to you are quite alone, you'll bring it into your resemble her in carriage and attire, so that she might appear more pleasing in the eyes of Frank

radiant and clear as that of an angel. Her And did he come? Aye, but it was three weeks first. Howeve he was not likely to receive such genuine heart peated her name many, many times when he was perience than he was in years, he detected the in those in the secret if they could have seen source from whence her observations sprung, how much smarter he was dressed this time that he should not; for if she was rustic in at- nervously anxious he felt all the way he walked cleanly, neatly, and respectably dressed. She would, without knowing the day, be on the route

She did not think herself a child, nor months. It may be supposed, therefore, that they,

She shook her head gravely.

"You promise too much," she observed. "I man. Frank observed the change in her with don't expect so much. I don't ask for it. 1 delight; he could hardly reconcile her manner shall never-never see you again; and I shall at the commencement of their acquaintance with not forget your name if you tell it me. You her present appearance and language, but the will never see me again after I bid you good bye change had been wrought; and as he, with parat the ferry, and I should like you—I don't know donable vanity, attributed it in a measure to the why-I cannot think why, yet I should like you influence of some personal merit he possessed, just sometimes, when you are quite alone, to say his love for her was increased by it. Their walk softly to yourself 'Lily!' and think—what your to the ferry occupied even a longer time than on the first occasion, and their parting was more "Lily is a pretty name. How can I forget it, fervid. The promise to come again was exacted so fond as I am, too, of the flower it names? and given repeatedly, each time before they said ure you here in my heart as a 'Lily of the Valley,' known only to themselves. Neither wrote, nor did either breathe a word to a soul of the other's "Will you—will you indeed?" she exclaimed. existence. She treasured Frank in her heart, And if she had not turned her head away, Frank and would have hated that any one should hear

Yet a change came to both most unexpectedly. wondered what was to come of it all. He resolved, Frank was selected almost at a day's notice to proceed to the West Indies to manage a branch establishment for his employer. The post was most lucrative, and the selection an honorable compliment to his ability and integrity. There was no getting out of it: and urged by friends "It is a country name, and the vicar says it is and by his parents, who saw in it a fine opening pretty one. It is Mayblossom. Lily May- for him, he accepted it. It was now Wednesday ssom is the whole of my name. And what and he was to sail on the Sunday following ; but is yours, sir?" You know you promised to tell he had no intention of going without seeing Lily,

not he! "Lily Mayblossom!" he repeated twice or thrice. And he looked into her face, which, was not there; he could hardly expect her. Five find out her residence, for to go away from England without bidding her farewell, he would not. He sallied into the small inn and called for a

glass of ale. A girl served him; when he paid "Ay, sure," she returned. "Where does she live, my girl?" he inquired "Don't know now," said the girl, "She and

away, woman an' all." Of twenty different persons did Frank make That evening there was no other visitor a inquiries in the village; he even called upon the vicar, but could learn no more than he had obtained from the girl at the inn.

DR. AYER: I have been entirely oure by your Pills of Rheu
matic Gout—a painful disease that had afflicted me for years.

VINCENT BLIDELL. Lead and Oil CONSTANTLY on hand, by the subscriber, a large and fresh stock of the best Leads, Zinc, Varnishes, Olis, Turpentine, Japan, and Paint Brushes. 16 J. S. MANLEY. 20,000 CIGARS for sale at West end Kennebec bridge, by J. S. MANLEY. For Dropsy, Plethora or Kidney Complaint.

Powder, Shot, Caps and Fuse,

For Dropsy, Plethora or Kidney Complaint, requiring an active purge, they are an excellent remedy.

For Costiveness or Constitation, and as a Dinner Pill, they are agreeable and effectual.

Fits, Suppression, Paralysis, Inflammation, and even Deafness, and partial Blindness, have been cured by the alterative action of these Pills.

Most of the Pills in market contain Mercury, which, although a valuable remedy in skilful hands, is dangerous in a public pill, from the dreadful consequences that frequently follow its incantious use. These contain no mercury or mineral substance whatever. POWGER, SHOW, Cape

Notice to Mill Owners.

The undersigned, having the Agency of Blake's Direct Acting Centre Vent WATER-WHEEL, for the State of Maine, is prepared to furnish Mill Owners and others with a Wheel, which, for durability, steadiness of motion, and economical use of water, is not surpassed by the best breast wheels in use. This wheel has been introduced in this State about one year, and between thirty and forty have been put in operation, giving better satisfaction than any other wheel heretofore used. Those in want of Water Wheels are requested to examine them at the Machine Shop of Holmes & Robbins, in this city; and for the merits of the Wheel they are at liberty to refer to either of the following:

Messrs. Richards & Hoskins, John Moore, Clay, Frost & Co., of this city; Messrs. Drake, Mitchell & Co., Mechanic Falls; Messrs. Kendail, Mt. Vernon; Messrs. E. M. & R. Sawtelle, Sidney; Mr. George W. Billings, North Monmouth; and Russell Eaton, Augusta.

RICHARD K. LITTLEFIELD.

TITCOMB, on the premises.
West Gardiner, March 30, 1857.
LIGHTNING RODS! Carriages will be in readiness to take passengers to and from he cars.

G. W. & T. F. YOUNG, THE subscribers, having purchased the exclusive right to sell CANADIAN CAMPHOR CREAM,—an excellent remedy for Chapped Hands. Sold for 12 cents a box, by J. S. MANLEY. 'Otis' Improved Patent Lightning Conductors' in the several counties set against their names, take this method of calling the attention of the public to the merita of this rod, and to the importance of having their buildings protected by its OWELL'S CATARRH MIXTURE—a good article, for sale and to the impount of damage done, and losses sustained every treat from the effects of lightning,—the serious and often fatal

THE subscriber, thankful for the very liberal patronage which he has received during a seven years' practice in his present location, takes this opportunity to inform his friends and the public generally, that he still continues at his old stand, where he may be found ready to perform all operations upon the teeth. He manufactures and inserts artificial teeth, from one to an entire set, upon any of the principles and in any of the styles known to the denial profession. He hopes, by care and faithfulness, to merit a continuance of favors.

THE undersigned, formerly of Augusta, respectfully informs his friends and the public in the vicinity of Waterville, that he has established himself there, and has taken a store one donorth of J. M. CROCKER'S, with the intention to carry on the Embroidery and Fancy Dry Goods Business.

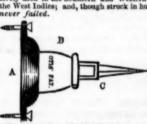

He flatters himself to be thoroughly acquainted with the above business in all its branches; and having just returned from New York and Boston, where he has carefully selected, and will receive throughout the season, a rich and fashionable stock of EM-BROIDERIES, FANCY AND DRY GOODS, he offers them at such prices as will be Great Inducements to Purchasers.

Ladies of Waterville and vicinity, having as fine a stock of Goods as there is in the market, I most humbly beg a share of your patronage.

Pure Durhams for Sale.

The preat amount of damage done and losses sustained every year from the effects of lighting,—the serious and often fatal injuries to persons, are all too well known to the verision, in all instruments and property, is a desider-location, in a filter of the public in any of the principles and in any of the principles and in any of the typic importance of favoral profession.

He frequent failures of the old "staple red," long since demonstrated by separated the first mentangence of insulation wholly ineffectual control of insulation wholly ineffectual the first market the importance of insulation wholly ineffectual control of J. M. CROCKER'S, with the intention to carry on the gasse
